FY26 Revenue by Region — Multi-Page Tables

One logical table spans three physical pages. The header repeats on every page, body rows alternate their fill, and each numeric column has its own alignment. The running header and footer are page furniture, not document content.

Region	Units sold	Gross	Net	Growth
EMEA 01	1,200	$57,600	$47,232	1.0%
North America 02	1,211	$59,339	$48,657	2.1%

Iberia 58	1,827	$89,523	$73,408	2.7%
Oceania 59	1,838	$91,900	$75,358	3.8%
India 60	1,849	$94,299	$77,325	4.9%

Year-over-year roll-up

A second, independent grid exercises merged cells: one rowspan down the first column, one colspan across three numeric columns, and a multi-line cell.

Quarter	Marketing	Research	Support	Total
Q1	120	240	80	440
	138	252	91	481
H1 combined			258	921 verified

The H1 row is a single cell across the marketing, research and support columns. Its total is a multi-line cell, so GFM alone cannot represent it.

Table notes

All numeric columns in the primary table are right-aligned. The growth column is centered. These alignments must survive conversion.

Batched rectangle grid

Each cell below is a separate rectangle; all nine borders are stroked in one path.

Batch	Units	Net
ALPHA	120	$240
BETA	230	$460
