Rich media inventory

Two high-resolution raster assets and one inline icon are embedded verbatim. Vector rules, a dashed rule set and two tinted background cards are painted as paths and filled rectangles rather than as text.

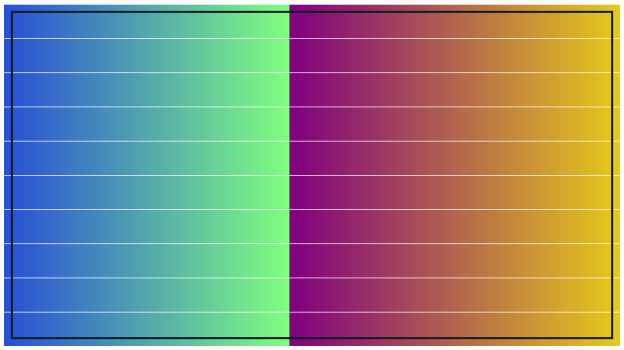

Figure 1 — 900x500 PNG block image.

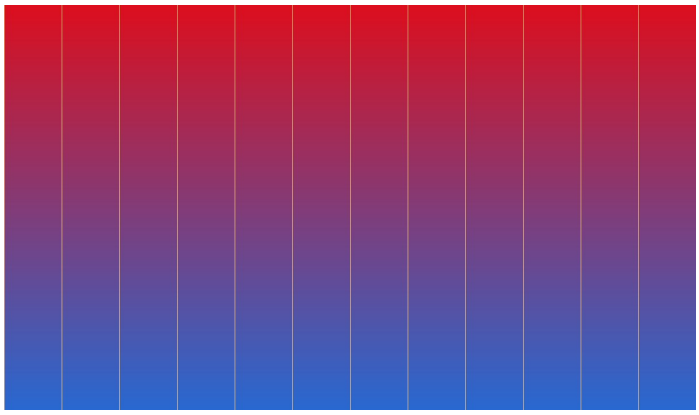

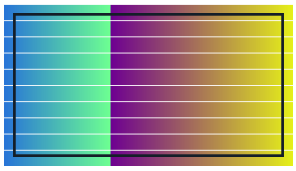

Figure 2 — 1200x700 JPEG block image.

Callout: retention lifted 4.2 points
This text sits inside a filled, stroked background box.

Inline figures follow this box.

Inline and wrapped media

Text wraps beside this figure rather than jumping below it. A reader that only concatenates content-stream strings will still find the sentence, but a reader that tracks geometry must also keep the image placement and its measured DPI. Text wraps beside this figure rather than jumping below it. A reader that only concatenates content-stream strings will still find the sentence, but a reader that tracks geometry must also keep the image placement and its measured DPI. Text wraps beside this figure rather than jumping below it. A reader that only concatenates content-stream strings will still find the sentence, but a reader that tracks geometry must also keep the image placement and its measured DPI.

An inline 48x24 icon follows this sentence: 

The icon above shares a baseline with the text, so it is an inline figure.

Vector layer

The page frame, header rule, vertical divider and dashed rule set are stroked vector paths. The yellow and blue cards are filled rounded rectangles with text on top; they must not leak into the prose as glyph soup.
