Rich media layout

Figure 1 is a block PNG; figure 2 is a block JPEG. Both are drawn at their natural aspect ratio, so an extractor must report non-zero pixel dimensions for each.

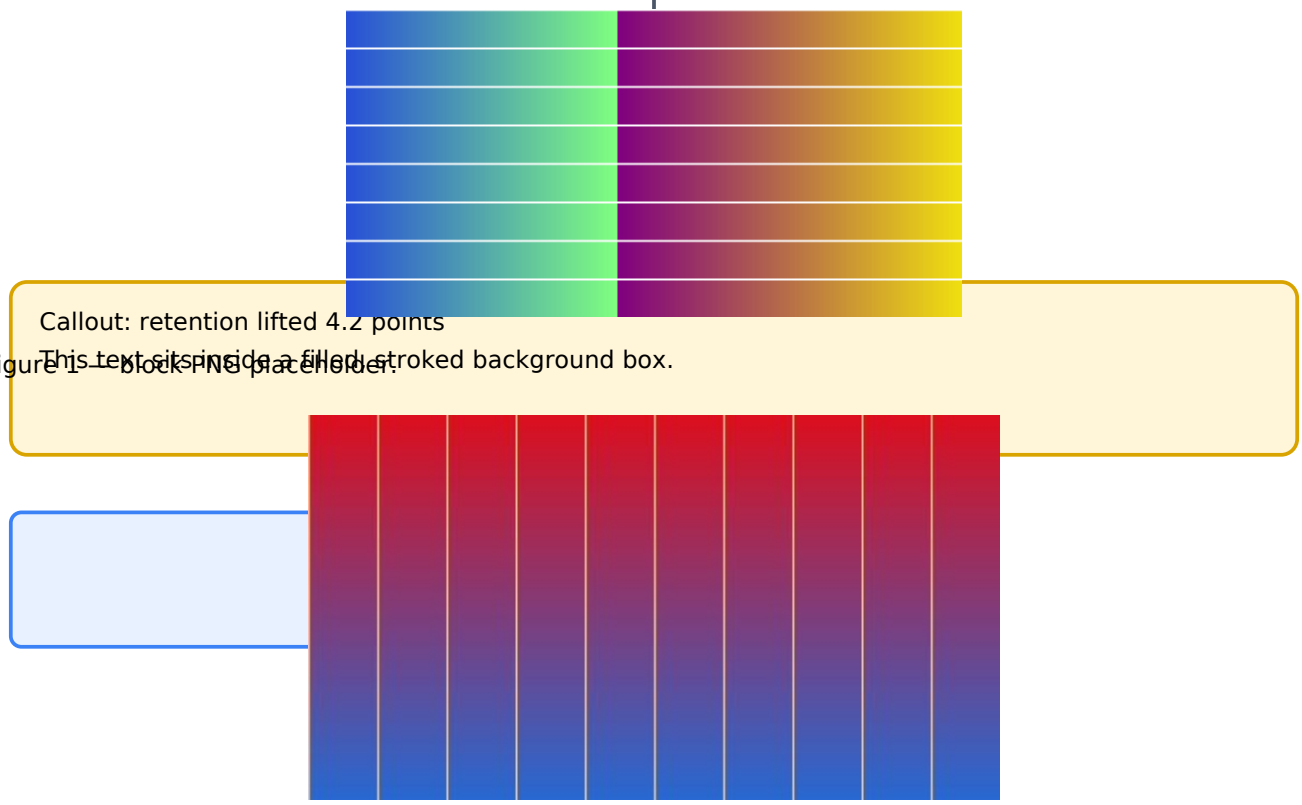

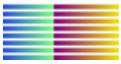

Figure 1 — block PNG placeholder.

Figure 2 — block JPEG placeholder.

An inline icon follows in the running text so the reader sees an image between two sentences rather than between blocks.

The icon above is 48 by 24 pixels and inline-sized.

Media inventory

One PNG, one JPEG and one inline PNG are embedded; the vector layer adds a page frame, a horizontal rule, a vertical divider and two tinted boxes.
